QUICK START GUIDE

Wi-Fi Digital Calendar for Family Schedules

Bracket Installation Guide

1 Position and drill in the screws

Screw sleeve (fixed) *4

Long screw (hitting the wall)*4

Short screws (lock bracket and digital calendar) *4

Screwdriver*1

Bracket*1

Small round screw hole

Large curved screw hole

① Choose the wall surface to hang the product.

② Place the bracket on the wall to be drilled and align the large curved screw hole position of the bracket (outermost four hole positions) to determine the drilling position.

(Use long screws to drill the screw holes)

③ Secure the four holes with black screws (as shown above), insert the white nail bar (as shown above) into the four drilled holes, and then insert the four black screws.
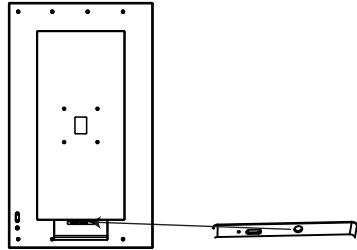

NOTE: The four screws should not be completely buried in the holes, leave some room for the bracket to hang.·

## Bracket Installation Guide

2 Lock the bracket with the digital calendar

① Plug in the digital calendar

③ Lock the holes aligned in step two one by one with short screws.

7.3 Hang the digital calendar on the wall by aligning the large curved screw holes (four outermost holes) with the four black screws on the wall.
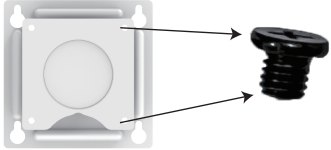

② Place the side of the bracket with the groove facing downwards, then align the four small round screw holes (the four holes inside) on the bracket with the four holes on the digital calendar.
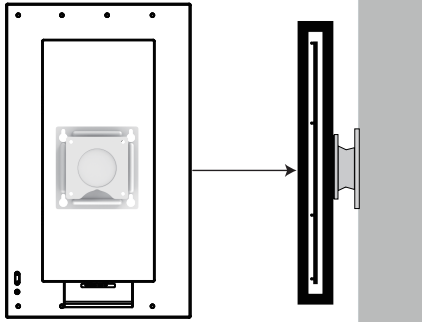

Bracket with this notch facing down
